Don’t Nuke Wisconsin’s Climate!

NO NUKES WISCONSIN

Governor Doyle and the Wisconsin State Legislature:

The Governor's Task Force on Global Warming has proposed weakening the laws regulating the licensing of new nuclear reactors in Wisconsin, to allow new reactors to be built without any permanent way to dispose of the high level radioactive waste they produce. **We ask the governor and legislature to oppose that change.**

We do not support construction of new nuclear reactors as a means of addressing the climate crisis. Available renewable energy and energy efficiency technologies are faster, cheaper, safer and cleaner strategies for reducing greenhouse emissions than nuclear power.
